

PRAETORIAN
CAPITAL

Disclaimer

Before making an investment decision with respect to Praetorian Capital Fund LLC or Praetorian Capital Offshore Ltd. (collectively, the “Funds”), managed by Praetorian PR LLC (the “Investment Manager”) and Praetorian Capital Management LLC (the “Manager”), potential investors are advised to carefully read the offering documents (including any relevant underlying agreements and supplements), Limited Liability Company agreement, and related subscription documents and supplements of the Funds (“Fund Documents”) and to consult with their tax, legal, ERISA, and financial advisors.

This Presentation contains a preliminary summary of the purpose and principal business terms of the Funds and does not purport to be complete; it is qualified in its entirety by the more detailed discussion contained in the Fund Documents. The specific terms of an investment in the Funds, including the investment strategy, contained within the Fund Documents may change without notice between the date of this Presentation and your receipt of the Fund Documents. **Nothing set forth herein shall constitute an offer to sell, or a solicitation of an offer to purchase, any securities.** Any such offer to sell or solicitation of an offer to purchase can be made only by Fund Documents which contain additional information (including information regarding certain risks of investing) that is material to any decision to invest in the Funds.

Information contained herein is not warranted by the Investment Manager or the Manager as to completeness or accuracy, express or implied, and is subject to change without notice. Charts, tables, and graphs are not independently audited and not intended to assist the reader in determining which securities to buy or sell or when to buy or sell securities. Risk management practices and methods are for illustrative purposes only and are subject to modification.

This Presentation may contain forward-looking statements as of the original date of this document which may be identified by, among other things, the use of words such as “expects,” “anticipates,” “believes,” or “estimates,” or these terms’ negatives, and similar expressions. Forward-looking statements reflect the Investment Manager’s views as of such date with respect to possible future events and no party has an obligation to update any of the forward-looking statements in this document. **No assurances can be given that the Funds’ investment objectives will be achieved.** Actual results could differ materially from those expressed in the forward-looking statements. Investors are cautioned not to place undue reliance on such statements.

Net return data is prepared by the Manager and presented after the deduction of incentive allocation, and all applicable fees and expenses in place at the time, which were: a maximum of 2% expenses from inception on January 1, 2019 through December 31, 2020, and 1.25% management fee since January 1, 2021. The incentive allocation, set at 20%, is subject to a high-water-mark provision, accrued monthly, and generally crystallized annually. Additionally, net return excludes performance from the side pocket portfolio, which comprises certain illiquid positions that have been valued at zero before being assigned to the side pocket portfolio on April 1, 2022. Individual investor performance may vary due to investment timing, participation in the side pocket portfolio, and specific fee arrangements. **As with any investment vehicle, past performance does not guarantee future results.**

Return objectives, if included, are provided for comparison purposes and only as a guideline for prospective investors to evaluate a particular investment program’s strategy and accompanying information. Targeted returns, if presented, reflect subjective determinations by the Investment Manager. Performance may fluctuate and should be evaluated over the time period indicated and not over shorter periods. Targeted returns and return objectives are not intended to be actual performance and should not be relied upon as an indication of Funds’ or an investment’s future performance. An investment in the Funds contains risks, including the risk of complete loss.

The Sortino Ratio is a risk-adjusted metric used to determine the additional return for each unit of downside risk. It is calculated by taking the Fund’s monthly annualized net return since inception minus the average risk-free return over the same period, divided by the annualized standard deviation of negative returns. The risk-free return is computed using the U.S. 3-month T-bill discount rate. The Sortino Ratio is available upon request.

The contents herein are the subjective opinion of the Investment Manager unless otherwise noted.

This Presentation is furnished on a confidential basis and is not intended for general distribution. Therefore, it may not be copied, quoted or referenced without the Investment Manager’s prior written consent.

Seeking *absolute* returns through *inflection investing*

Praetorian Capital is a hedge fund managed by **Harris “Kuppy” Kupperman** dedicated to seeking non-correlated, asymmetric returns in a benchmarked world. The actively-managed strategy seeks absolute returns through highly-concentrated investments exhibiting inflecting secular or cyclical tailwinds, and Event-Driven special situations.

Firm Overview

Alpha at Inflections

We believe the highest IRR is attained near macro or idiosyncratic inflections. We seek to identify strong tailwinds to avoid value traps.

Concentration

We believe concentration leads to absolute outperformance. We seek to hold 6 to 12 of our “best ideas” and are agnostic about their monthly volatility.

Flexibility

Modern hedge fund “style boxes” restrict Alpha and can lead to underperformance. We seek to shift our strategy in line with changes in the opportunity set, to provide our investments a positive tailwind.

Actively Managed and Unhedged

We believe hedges cost upside. Instead, we tactically trade Event-Driven situations (long and short) and utilize option strategies for non-correlated, short-term returns to augment our core portfolio holdings.

**We are looking to partner with a highly select group
of investors who understand to outperform, you must invest differently**

The Hedge Fund Problem

Typical hedge funds:

Have **underperformed the market** or are highly correlated to the market, aka “closet” indexers

Put themselves into a style box in an **effort to raise capital, creating a drag on performance** when the style falls out of favor

Have **little regard for macro forces**, catalysts or trend inflections which can create headwinds and perpetuate value traps

Use **marketing catchphrases** to garner assets

The Praetorian Solution

Modeled after “old school” hedge funds; **we are concentrated, active and volatile**, believing absolute performance trumps benchmarked returns

Our bottom-up analysis provides **downside protection while seeking inflecting tailwinds** that help sidestep value traps

We eschew style boxes and marketing labels like “ESG.” Active management and our “go anywhere” inflection mandate **provides the flexibility to capture Alpha in any market environment**

Fund consultants and allocators like to require style boxes or labels such as "long-short," "macro," or "ESG"
At Praetorian, our only style box is “Alpha.”

Inflection Investing

Praetorian seeks to build a portfolio
of 6 to 12 asymmetric
opportunities with multi-bagger
potential

*through inflection
investing*

The “Classic” Inflection Process

The Inflection Trigger / Catalyst

The intersection of value and the inflection “trigger” accelerates price discovery

* Illustrative purposes only. The above chart is not representative of an actual trade.

Praetorian seeks to build a portfolio of 6 to 12 asymmetric opportunities with multi-bagger potential and minimal downside through *inflection investing*

Macro Inflections

➤ **Thematic tailwinds**
(e.g. Sector Underinvestment, Secular Fund Flows, Government Policy)

➤ **Cycle changes**
(e.g. Fed Policy, Business Cycle, Market Regime Change)

Event-Driven Inflections

➤ **Company Transformations**
(e.g. Post-reorg, CEO Changes, Fallen Angels, Privatizations, etc.)

➤ **Idiosyncratic Special Situations**
(e.g. Spin-offs, Busted M&A, 13D/Activist, Merger securities, etc.)

**Longer-term/Core Book
Inflections**

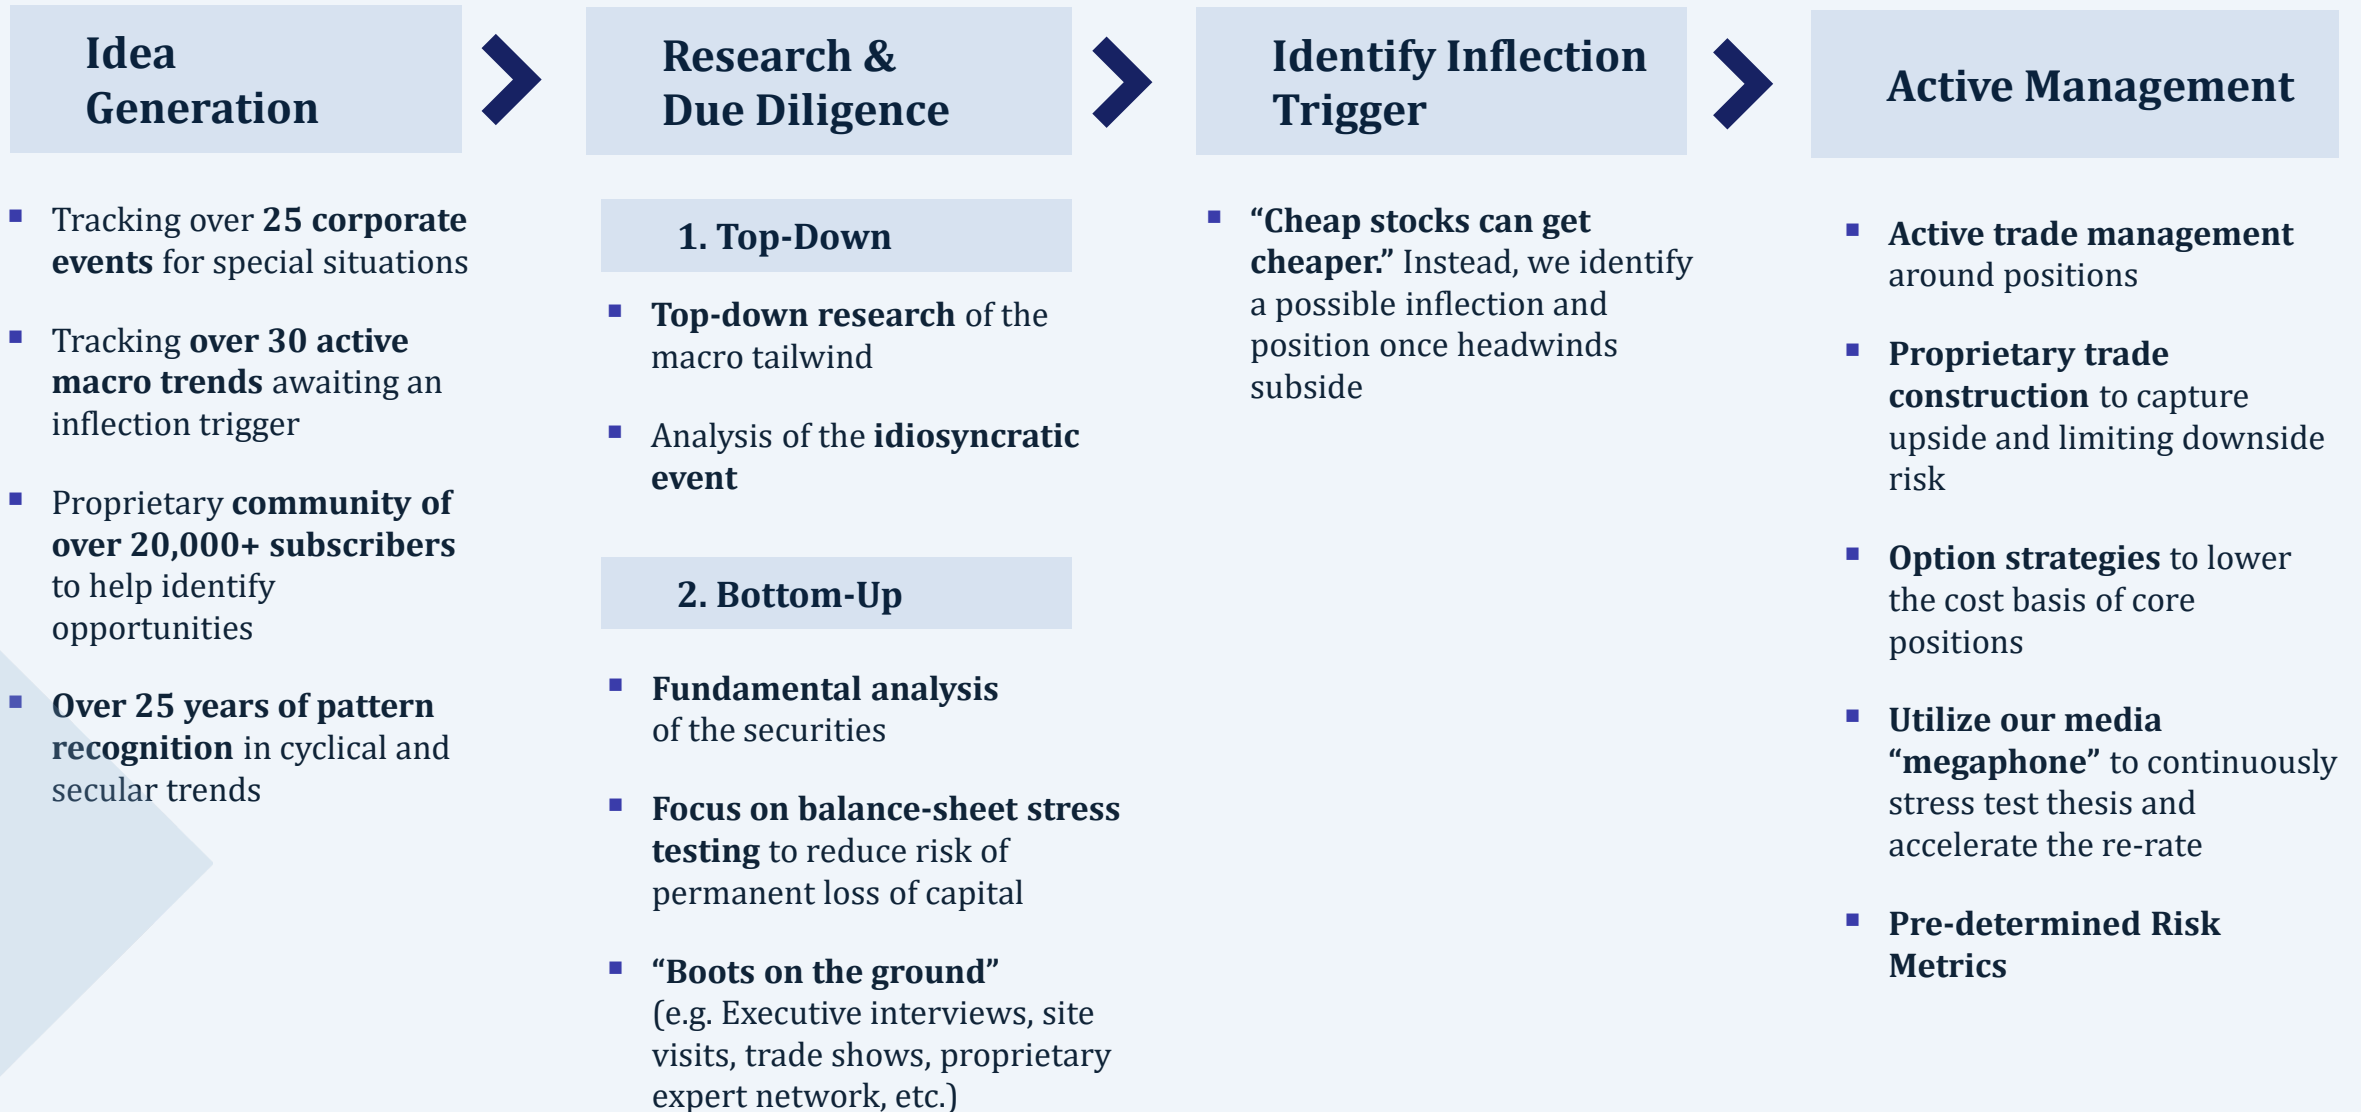

**Event-Driven
Trading**

Shorter-duration Event-Driven trading “self-funds” the longer-term inflections and provides liquidity in “core” book drawdowns

Process Driven Results

Our consistent media presence gives us

Potential to influence corporate strategy

Proprietary access to industry experts

Ability to draw investor interest to our core inflection themes

* Praetorian has elected a 506(c) designation, allowing us additional flexibility on our media and marketing exposure

- Operational Due Diligence review completed by best-in-class firm

**Other funds pay for
their volatility.**

We get paid for ours.*

**PRAETORIAN
CAPITAL**

How does Praetorian fit into your portfolio?

We seek positive carry exposure and *right tail returns*.

We are *contrarian* and *uncorrelated*.

We strive to provide *exposure to niche trends* before they are mainstream.

We are fundamentally-driven to *protect our downside*.

We are active and macro-driven to *provide our upside*.

We get paid for our volatility.*

Principal Bios

Harris Kupperman

Founder & Chief Investment Officer

Harris Kupperman is the **founder of Praetorian Capital Management LLC**, an investment manager focused on using inflecting trends to guide stock selection and Event-Driven strategies.

Mr. Kupperman is also the author of Praetorian Capital's public blog, Kuppy's Korner, where he discusses his investment process and comments on hedge fund industry trends. Additionally, Mr. Kupperman was the CEO of publicly traded Mongolia Growth Group (YAK: Canada and MNGGF: USA) through May 2026, a role which gave him a unique perspective into companies as both an operator and financier. **He maintains his role as Chairman of Mongolia Growth Group.**

Harris holds a **Series 3 license**.

Paul Zavaliy, CPA

Chief Financial Officer & Chief Compliance Officer

Paul's professional expertise as a CPA is backed by almost 20 years of **public accounting experience**, obtained from working at major CPA firms both in New York and Miami. Paul spent the last 17 years **focusing almost entirely on hedge fund and private equity industry** providing such services as audits, reviews, and compilations among others.

Prior to joining the Praetorian team, Paul was an **Associate Principal at Kaufman Rossin & Co.**, which has been the auditor for Praetorian funds since inception.

Paul has been a **CPA** since 2005 and is a member of an **AICPA**.

Principals have a significant portion of their net worth invested in the fund.
We get paid to invest, not paid to deploy capital.

Principal Bios

Aaron Bublely

Chief Operating Officer

Aaron has nearly **20 years in the hedge fund industry** occupying a variety of front office roles such as equities analyst, commodity trader and Portfolio Manager.

Prior to re-joining **Praetorian PR** as the COO in 2023, Aaron co-founded and **managed the special situations research arm of MGG Ltd.**

Aaron has an accounting degree from **University of Miami** and an MBA from the **University of Illinois.**

Nick Cousyn

Director of Client Relations

Nick's career in Capital Markets has **spanned over 20 years**, with a background in Market Making, Research Sales and Trading, Banking and Executive level positions. He's worked for such firms as **Deutsche Bank, Wells Fargo** and **Natexis Banque Populaire**, with experience in both the US and Emerging/Frontier markets, in equity, debt, derivatives and private equity.

Nick holds a **Series 3 license.**
